

GURUVAIYA MUTHUKARUPPAN

Automation Architect | Sr. SDET | 19+ Years Enterprise QA

Chennai, India (Open to Remote) | +91 6381034340 | guru4ec@gmail.com | linkedin.com/in/guruvaiya-m |
github.com/guru4ec-dev

PROFESSIONAL SUMMARY

Automation Architect and Sr. SDET with 19+ years of experience leading enterprise quality engineering across Insurance, Retail, Banking, Telecommunications, and Supply Chain. Specializing in building scalable automation frameworks from the ground up, embedding quality into CI/CD pipelines, and delivering measurable outcomes for global enterprise clients. Experienced in remote-first delivery with 9+ years of international on-site engagement across the USA and Australia. Seeking remote Sr. SDET / Automation Engineer roles where deep Java automation expertise and cross-domain delivery experience create immediate impact.

KEY DIFFERENTIATORS

- Built RAFT, TAM & eRAFT automation frameworks from scratch at TCS CoE — adopted by JPMorgan Chase, Bank of America, Nielsen, and Humana across multiple global accounts.
- Reduced regression cycles by 75% (4 hours → 1 hour) through Dockerized Selenium Grid with parallel execution — enterprise-scale QA cost reduction.
- GCP Certified Professional Cloud Architect — rare among SDETs, bridging test engineering, cloud infrastructure, and DevOps delivery.
- Delivered compliant automation across 5 regulated industries: Insurance (Allianz), Tier-1 Banking (Commonwealth Bank), Fortune 500 Retail (Home Depot), Telecom (Vodafone), and Supply Chain (Softeon — SONY, Ben E. Keith).
- Proven remote-ready leader — managed and mentored cross-functional SDET teams across onshore/offshore models across time zones.

TECHNICAL SKILLS

Java, Python, C#, Selenium WebDriver, Selenium Grid, Playwright, Cucumber, BDD, TestNG, Appium, REST Assured, Postman, Swagger, SOAP UI, Jenkins, GitHub Actions, Docker, Maven, AWS, JIRA, Xray, Zephyr, Agile, Scrum, Shift-Left Testing, TDD, Dockerized Selenium Grid, Parallel Execution, Cross-browser Testing

CERTIFICATIONS

- GCP Certified Professional Cloud Architect — Google Cloud Platform

PROFESSIONAL EXPERIENCE

Automation Architect | Senior SDET | [Tata Consultancy Services](#)

Jan 2024 – Present • Chennai, India

Enterprise test automation delivery for Allianz (global insurance leader) — designing and scaling automation infrastructure across web and API platforms.

- **Reduced UI regression runtime by 75%** (4 hours → 1 hour) by architecting a Dockerized Selenium Grid with parallel execution, dynamic explicit waits, and API-layer test state setup.

- **Architected scalable BDD automation framework** using Cucumber + Selenium + Jenkins from scratch, mapping step definitions to critical user journeys across Allianz's insurance and claims flows.
 - **Solved complex real-time Selenium challenges:** dynamic web elements, multiple iFrames, popup handling, synchronization issues, and cross-browser compatibility — significantly reducing flaky test rates.
 - **Shifted API validation left** using REST Assured, Postman data-driven collections and Swagger contract tests — enabling backend defect detection before frontend sprints began.
 - **Integrated full-stack automated suites** into Jenkins and GitHub Actions CI/CD pipelines, enforcing mandatory quality gates on every PR.
 - **Stabilised a failing CI suite** by leading root-cause analysis on flaky tests and introducing quarantine protocols — restoring developer trust and reducing false-failure alerts by 60%.
-

Automation Test Manager | [Tata Consultancy Services](#)

Jan 2019 – Nov 2023 • Atlanta, USA (On-site)

Led end-to-end automation strategy for Home Depot (Fortune 500) — managing cross-functional SDET teams for high-traffic e-commerce and supply chain systems.

- **Owned full automation architecture** for Home Depot's critical user journeys: Cucumber BDD framework, step definitions for checkout/inventory flows, and coverage standards across squads.
 - **Developed and owned the organization-wide automation strategy and roadmap** — aligning tools and platforms with business goals across multiple concurrent delivery streams.
 - **Built regression suites** covering critical purchase, cart, and inventory management journeys at Fortune 500 scale on a high-traffic e-commerce platform.
 - **Managed, mentored, and upskilled automation engineers** through code reviews and best practice coaching — consistently delivering high-quality releases on schedule.
 - **Drove CI/CD maturity** by embedding automated regression gates into the pipeline, preventing production escapes and accelerating release cadence.
-

Automation Test Lead | [Tata Consultancy Services](#)

Nov 2015 – Nov 2018 • Sydney, Australia (On-site)

On-site QA lead for Commonwealth Bank (CBA) — Financial Crime & Sanctions, Future Advice Model (FAM), and Customer Engagement Platform (CEP).

- **Engineered compliance-grade test automation** for CBA's Financial Crime & Sanctions platform (Fircosoft/SWIFT/NPP) — zero compliance-related production incidents across the engagement.
 - **Built BDD automation suites** for CBA's Future Advice Model (FAM), enabling regression coverage for a platform serving thousands of financial advisers across Australia.
 - **Delivered automation for CBA's Customer Engagement Platform (CEP)** integrated with Commsee and backend SQL systems — caught data-sync defects invisible to manual testing.
 - **Managed defect lifecycle** from discovery to closure across dev, SIT, and UAT environments.
-

Automation Test Lead | [Tata Consultancy Services](#)

Jan 2015 – Oct 2015 • Sydney, Australia (On-site)

- **Designed and developed Selenium WebDriver + Java automation** for Vodafone Australia's ATG/AWS e-commerce platform — enabling fortnightly releases previously blocked by manual regression.
- **Executed end-to-end coverage** across purchase, plan upgrade, and account management journeys.
- **Managed a team of automation testers** and served as primary automation liaison between dev, BA, and QA leadership.

Senior Automation Engineer — TCS Automation CoE | [Tata Consultancy Services](#)

May 2011 – Dec 2014 • Chennai, India

- **Co-developed RAFT, TAM, and eRAFT** — tool-agnostic automation frameworks adopted by Nielsen, Nationwide, JPMC, Bank of America, and Humana across TCS accounts globally.
- **Conducted PoC engagements and feasibility studies** across 6 industry verticals: Banking, Retail, Insurance, E-commerce, Healthcare, and Travel.
- **Led in-house training programs** and served as single point of contact with tool vendors, reducing framework-related blockers for client teams.
- **Performed automation effort estimation, ROI calculations**, and defined automation roadmaps for enterprise clients including JPMC, Bank of America, and Humana.

Automation QA Engineer | [Softeon India Pvt Ltd](#)

2006 – 2011 • Chennai, India

Product: Softeon SCflex — Enterprise Supply Chain Management (J2EE, SOA, Web-based)

- **Developed Selenium automation test suites** for SCflex covering Warehouse, Transportation, Yard, Order, and Parcel Management modules.
- **Delivered QA for US enterprise clients** including SONY, Ben E. Keith, and Network Global Logistics.
- **Validated critical ERP and EDI integrations** and multi-format reporting (PDF, HTML, Excel) across the web-based SCM platform.
- **Ensured cross-browser compatibility** and platform independence for a J2EE, database-independent enterprise application.

ACHIEVEMENTS & RECOGNITION

-
- Multiple client appreciation awards for outstanding automation delivery across global engagements.
 - Recognized by business partners for rapid turnaround on critical production issues.
 - Multiple 'On the Spot' awards for remarkable contributions to project delivery at TCS.

EDUCATION

-
- B.Tech – Electronics Engineering | MIT, Anna University | 2005
